

ENVIRONMENT POLICY

Allfab Constructions Pty. Ltd. believes that:

- Everyone has a responsibility to protect the environment
- Ecologically sustainable development is achievable and desirable.
- Sound environmental practices return human and economic benefits

To this end Allfab is committed to:

- Identifying aspects of its operations that have a significant impact on the environment.
- Controlling those operations and minimising their impact.
- Promoting the efficient use, reuse and recycling of resources, and the minimisation of waste
- Protecting the natural environment and preventing pollution.
- Complying with all applicable environmental laws, regulations and national standards.
- Communicating openly with employees, subcontractors, customers, regulatory bodies, and the general community on environmental matters.
- Setting environmental goals and measuring performance.
- Involving employees and subcontractors in continual improvement of work operations and work practices.

The way this will be achieved is set out in the Allfab Constructions Operations Manual and system procedures. All employees are required to comply with this Environment Policy and system requirements.
